

WIDE-ANGLE REFLECTORS

Installation and Operating Instructions

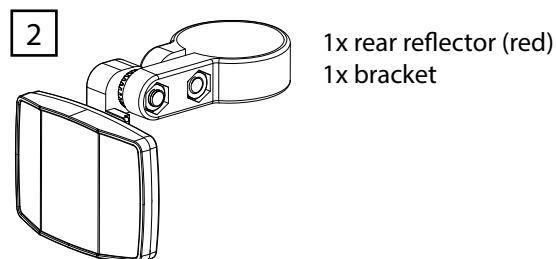

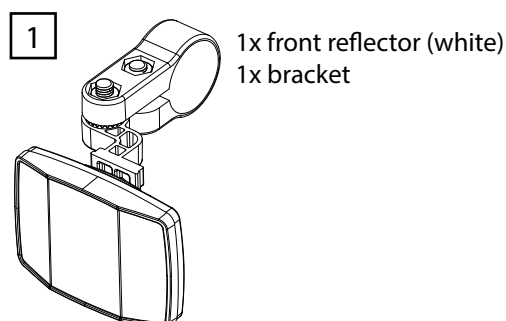

Intended Use:

This product is intended exclusively for use on bicycles. It is supplied in white (front) and red (rear).

The reflectors are for your own safety and must not be obscured by other attachments or luggage, not even partially. Regularly check the correct positioning of your reflectors. The reflectors must be installed and adjusted so that the reference axis is parallel to the vehicle's longitudinal median plane and parallel to the road surface.

This product is designed for outdoor use. Any use other than that described above or any modification of the product is not permitted and may lead to damage. The manufacturer accepts no liability for damages resulting from improper use. The product is not intended for commercial use.

Scope of Delivery:

Installation and Adjustment of the Front Reflector:

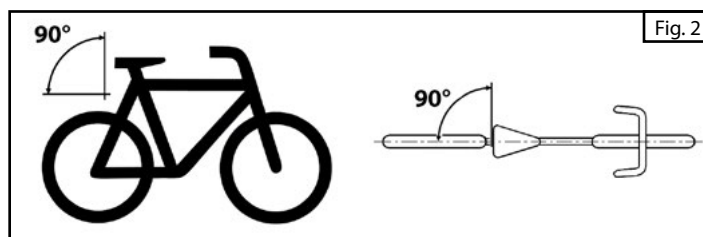

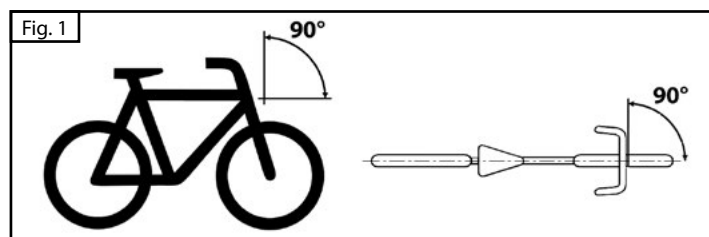

Attach the front reflector to the handlebar and fasten it using a suitable Phillips screwdriver. The front reflector must be installed at a tilt angle of 90° (see Fig. 1).

Ensure that no objects are placed in front of the front reflector.

Installation and Adjustment of the Rear Reflector:

Attach the rear reflector to the seat post and fasten it using a suitable Phillips screwdriver. The rear reflector must be installed at a tilt angle of 90° (see Fig. 2).

Ensure that no objects are placed in front of the rear reflector.

Caution! Regularly check the correct positioning and mounting height of your reflectors. They must be installed and adjusted so that the reference axis is parallel to the vehicle's longitudinal median plane and parallel to the road surface.

Cleaning:

Clean the product only with a slightly damp, lint-free cloth. Never fully immerse the product in water. Do not use corrosive or abrasive cleaning agents, as this may cause damage to the product.
